

Apoorv Verma

Data Analyst

(312) 730-7251 | apoorvverma1030@gmail.com | [Linked In](#) | [Portfolio](#) | Chicago, IL

EDUCATION

University of Illinois Chicago (UIC)

Master of Science, Management Information Systems

May 2025

GPA-3.4/4

University of Petroleum and Energy Studies, Dehradun, India

Bachelor of Technology, Electronics & Communication Engineering

May 2022

GPA-3.7/4

SKILLS

Programming Languages & Tools: Python, Java, SQL, Git, Jira
Database Technologies: PostgreSQL, SQL Server, SAP
BI Tools & Cloud Platforms: Tableau, Power BI, Snowflake, AWS, Google Cloud
Data Management: ETL/ELT, Data Cleaning, Data Modeling, Data Warehousing

PROFESSIONAL EXPERIENCE

Brainsharp Inc. | Orange, California

Feb 2026 - Present

Data Quality Assurance Analyst | Client: County of Santa Clara

- Developed and executed **advanced SQL validation queries** to audit **150K+ tax records** across property, marine & air, appeals and business modules, improving data accuracy and reducing inconsistencies by **20%**.
- Performed **end-to-end data validation of tax computation logic** (CPI adjustments, penalties, exemptions, YoY rollovers), ensuring **100% compliance** with California regulatory standards.
- Monitored and optimized **automated batch processing workflows** for e-filing and compliance notices, identifying and resolving **critical data mismatches across UI and backend systems**, reducing processing errors by **25%**.

Juggernaut Syndicate Corporation | Phoenix, AZ

Jan 2025 - May 2025

Business Operations Analyst | Project: Pegasus: Data-Driven Smart Ride-Sharing Platform

- Engineered the ETL architecture of a ride-sharing platform using **FlutterFlow** and **SQL**, achieving **80%** uptime and reducing ride-matching latency by 20% through AI-driven pricing and real-time analysis.
- Developed customer-facing features including multi-stop trips and secure payments, introduced an in-app virtual currency (**Pega**), boosting demand elasticity, increasing user retention by **25%**, and designed a **Gemini API chatbot** to enhance user engagement.

Charlandra Consulting and Counseling Services | New Jersey

Apr 2024 - Jul 2024

Business Strategy & Insights Analyst | Project: Video Analytics Pipeline- Content Performance & Platform Strategy

- Built a **data pipeline** to analyze large video counseling datasets, identifying key stakeholders and tracking content performance using **LLMs, BERT** and **sentiment analysis** to refine targeting strategies.
- Optimized monetization by analyzing 3,000+ YouTube channels, evaluating video traits, cost structures and revenue models, improving effectiveness by 40% using **NLP models**.

Splisys Consulting Pvt. Ltd. | Noida, India

Jan 2023 - Dec 2023

Business Analyst – Energy Operations | Client: Emirates National Oil Company (ENOC)

- Coordinated the full data workflow from build to Go-Live and post-Go-Live support, integrating **SAP IS-Oil & Gas** modules (**HPM, TD, TSW**) with **SD, MM, and QCI**, reducing manual effort by 40%.
- Structured **HPM Quantity Conversion Interface**, improving hydrocarbon inventory data while enhancing **accuracy by 30%** using **SAP QCI** and achieving **80% validation** through cross-functional collaboration and **RICEFW**-based data quality checks.

Defence Research and Development Organization (DRDO-SAG) | New Delhi, India

Nov 2020 - Feb 2021

Technical Consultant

- Built a **geospatial data integration framework** using OpenStreetMap and Python for real-time visualization, implemented PostGIS and deployed pipelines (**OSMnx, GeoPandas, NetworkX, Matplotlib, SQL**), optimized **data retrieval by 15%** and refined shortest path algorithms for military navigation.

PROJECTS EXPERIENCE

Delta Airline Operations and Competitor Analysis 📊

- Designed interactive Tableau dashboards using **12+ months of flight data**, leveraging Python to clean and process datasets, extract key metrics, and create **geospatial, network, and temporal visualizations** for flight distribution, delays, cancellations, and route analysis.
- Conducted cohort analysis on Delta's performance data, providing descriptive statistics on efficiency (0.017% cancellations, 984K+ flights), and **devised predictive models** that reduced departure delays by an average of **10.36** minutes.

Stock Market Analysis - Price Movement Prediction

- Formulated predictive models for NIFTY-50 stock movements using Logistic Regression, SVM, and cross-validation, resulting in **93%** accuracy (**Logistic Regression**), 90% (SVM), and 98%+ class-wise accuracy for significant price changes (>4% gains, < -3% losses).
- Processed **470K+** instances from 52 companies using data cleaning, KNN imputation and PCA (90% variance retained), boosting Naive Bayes accuracy from **47.5%** to **62.85%** while reducing dimensionality and eliminating redundancy.

Power BI Dashboard Development & Data Visualization 📊

- Leveraged Power Query, advanced DAX calculations, slicers, drill-through navigation and custom visuals to build user-friendly dashboards that revealed actionable insights across domains - **employee attrition patterns, product category performance, ride behavior trends**, and **global sports event metrics** enabling better **KPI** monitoring and stakeholder engagement.
